Experience

Senior Product Designer

InhabitIQ

2016 - Present - New York, NY

Lead the design vision and helped set product direction across multiple platforms at InhabitIQ. Designed an auditing service for client data that became one of our most successful products by revenue stream. Used design sprints to create a system that allowed for better workflow and results. Helped developers with front end code to deliver features using HTML / SCSS / Rails.

User Experience Designer

Simplenight

2015 - 2016 - New York, NY

Helped identify and solved complex system problems through research and testing to greatly improve UX on the platform. Worked collaboratively with UI designers and developers to accelerate innovation, increase efficiency, and cut costs by solving and fixing problems early on. Implemented touchpoints and white labels for other brands using our platform in HTML / SCSS.

Product Designer

DreamItReel

2015 - New York, NY

Improved the platform and led responsive design which increased visibility and conversion rates. Helped founders optimize their product through testing. Contributed in front end development to help launch product in a timely maner using HTML / CSS / JSS.
